

## FORESTA: COMPLEX SOLUTIONS FOR EVERY INTERIOR

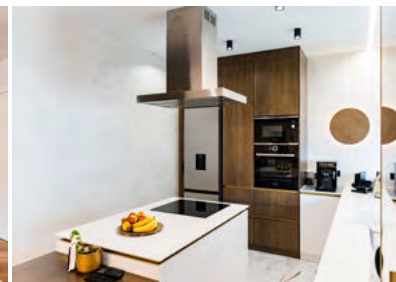

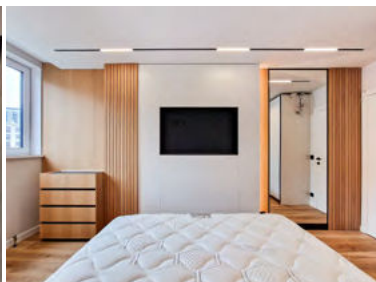

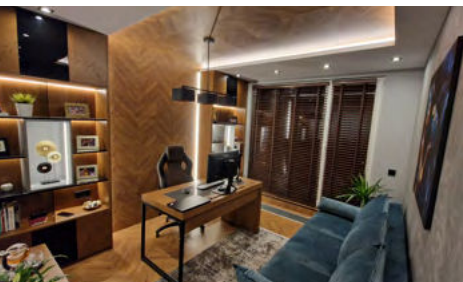

The most important aspect of interior design transformation is to be sure that the realised project will look just like the one you have seen, liked, and approved on renderings, and that it will go even further. Every client deserves to be sure that the bespoke furniture fits perfectly into its places, that the mechanisms work flawlessly, the sink and the upholstery are in the right shades, and that everything is delivered in time and assembled carefully and professionally.

With Foresta, you are 100% sure that each step of your interior transformation is crafted to perfection without delays and within the budget. Established in 1990, the Bulgarian company stands out with its mastery of two crucial competencies: design and manufacture of bespoke furniture for all types of interiors, clients and budgets, and interior design in which each detail is carefully considered, planned and realised – from the layout to

the materials, the fabrics and the colours, to the type of the appliances and the equipment used.

The result are scores of satisfied private and corporate clients. Interiors created by Foresta are all unique, yet all of them are alike in one thing – they have been created by experienced and dedicated professionals with passion for perfection, beauty, modern technology, and functionality.

Sofia, 51 Cherni Vrah Blvd (appointments only)

Gabrovo, 30 Industrialna St
